**I. SERVICES TENTATIVELY REQUESTED**

The County of Ventura, Resource Management Agency, Planning Division (hereinafter “County”), is requesting proposals for consultant services to perform the tasks relating to the Surface Mine Inspections Program, currently performed by County staff. The County is currently responsible for the inspection, reporting and enforcement of violations for eleven (11) active surface mines within the County’s jurisdiction. These mines currently extract sand, gravel, clay, silica sand, gypsum, and hard rock. Each mine has a Conditional Use Permit which details the mine’s operational requirements, and each is subject to regulations outlined by the Surface Mining and Reclamation Act (SMARA) enacted by the California Department of Conservation. Under SMARA, the County is responsible for assuring that adverse environmental impacts are minimized and mined lands are reclaimed to a usable condition. In order to actively mine within the County, certain criteria must be met to ensure compliance with SMARA. Each mine also has a Reclamation Plan which details the plans for complete reclamation of the mine site after mining has ceased. The Reclamation Plan is used as a tool to guide the mine operator in achieving site reclamation once the life of the mined site has ended. To ensure compliance, the mine operator must comply with the Conditional Use Permit and Reclamation Plan through the life of the project and permit annual inspections by the County. An understanding of each site’s Conditional Use Permit and Reclamation Plan is the primary instrument used to address compliance during annual site visits.

Along with the Reclamation Plan, certain financial obligations must be met. An annual Financial Assurance Cost Estimate (FACE) must be reported by the mine operator to identify the total cost of immediate reclamation. Each mine operator is responsible for maintaining a Financial Assurance Mechanism (FAM), which holds the operator accountable for total reclamation outlined in the FACE. The mine operator is also responsible for maintaining a deposit account with the County to fund time spent during inspection and reporting. The County works together with the Division of Mine Reclamation (DMR) and the mine operator to ensure compliance with SMARA and proper reclamation of each mine site.

**Scope of Work (SOW):** To aid the County in surface mine inspections, the following tasks will be required.

**Task 1 File Management**

For each of the eleven mines in the County, provide the following:

- Verify that all mine files are current. Mine files must include an updated FACE, FAM, Reclamation Plan, current and past mine inspection report, and current aerial photo of mine site. Both the hardcopy and the electronic files must be kept current. *Note: all electronic files were current as of November 1, 2019 but will require some maintenance to finalize 2019 compliance. Hardcopy files will need to be reviewed and updated as needed. FAMs may also need to be updated per 2019 estimates.*

**Task 2 Enforcement**

For each mine within the County, violations must be brought into compliance.

Prior to performing the surface mine inspection, the County is required to enforce any outstanding violations that may have been identified from the previous year. Each mine report will need to be

reviewed in order to identify previous violations. In the case of violations, communication with mine operators to bring outstanding violations into compliance must be performed. This should be carefully coordinated with County staff.

### **Task 3 Mine Inspections**

An annual site visit to each of the eleven mines is to be performed.

As preparation for mine inspections, an evaluation of each site's Reclamation Plan, plot plan, aerial topography, prior violations, FAM and FACE will be required. Each site visit will need to be pre-arranged with the mine operator. The purpose of the site visit is to assure compliance with the Conditional Use Permit and Reclamation Plan filed with the County. A Surface Mine Inspection Report is to be submitted to the mine operator and DMR using current State-approved templates. Upon completion of the site visit, the following will be required:

- A draft Surface Mine Inspection Report (report) to be reviewed by County staff.
- Revision of report (1 revision)
- Submission of report to mine operator and DMR
- Filed report into County filing system.

### **Task 4 File Finalization**

The following subtasks are to be completed post mine inspection:

- Identify any mine operators that are out of compliance to County staff.
- Assure mine site meets all required regulations and financial responsibilities.
- Under SMARA regulations, mine operators must submit an updated FACE within 30 days of inspection. Within 60 days of receipt, contractor would review said FACE and ensure mine operators have submitted a FAM within 15 days of FACE approval by Lead Agency.

### **Task 5 As-Needed Tasks**

The following tasks may be necessary for additional work related to the Surface Mine Inspections Program.

- Additional Field Visits: In the event of non-compliance issues requiring a follow up field visit to verify compliance.
- Meeting Attendance: The consultant may be asked to meet with staff in the field, or at County offices to review and discuss specific mine operation, SMARA, or land-use related issues, as well as being contacted by telephone from time to time for advice and comments on such issues.
- Other Unforeseen Mine Inspection Related Issues: At the request of the County, this optional task is included for 20 hours of as-needed support for FACE/FAM coordination with DMR or other related coordination and review tasks.

### **Task 6 Contract Planning (Optional)**

If your firm also has contract-planning services for the processing of entitlement requests for mining projects, please include those services in your proposal. Such land use applications will

typically be processed by County staff; however, contract planners may be used on an as-needed basis during workload demands. This task would involve some or all of the following:

- Review applications for completeness.
- Confer with applicants and agency representatives to identify and resolve issues.
- Review and/or prepare documents pursuant to the California Environmental Quality Act (CEQA).
- Prepare and present reports to Planning Director, Planning Commission, and Board of Supervisors.
- Conduct post-discretionary review of compliance with conditions of approval and mitigation measures.

**Timing/Costs**

Fees for the various tasks listed above will be on a time and materials basis and will be paid for by deposits from the mine operators. The work will commence within 10 days of contract approval and shall include the above tasks through December 31, 2022. The contract shall initially be for a term of three (3) years subject to annual renewal upon satisfactorily completing the previous year's scope of work.
