

Introducing Technical Assistance Grants!

\$2.5M in Grant Funding to California Community Organizations to Engage In the Cleanup Process of Contaminated Properties In Their Communities

The Department of Toxic Substances Control (DTSC) invites residents, non-profit organizations (501c3) and community advocates/organizations that serve those impacted by environmental issues to learn about the **Technical Assistance Grant (TAG)** program and its eligibility requirements. Environmental consultants are instrumental in this program, but only in collaboration with the affected community-based organization(s).

The TAG program provides vulnerable communities an opportunity to actively participate in the oversight of environmental cleanup activities that affect them. The Program will provide grants ranging from \$40,000-\$150,000, to hire and direct an independent technical advisor who can assist in analyzing, interpreting, and communicating complex environmental information to residents living within a 5-mile radius of an active DTSC cleanup project.

For current information, helpful links, and resources on the TAG program visit the [webpage](#).

APPLICATIONS ARE OPEN IN THE [FLUXX PORTAL](#)

Want to Apply for TAG Funding? Follow these steps to check your eligibility and get ready to apply!

1. Read the [TAG program guidelines](#), amended on December 18, 2023
2. Watch the [December 6th webinar recording](#), where DTSC and the Center for Creative Land Recycling discuss the program, answer audience questions, and demo the [Site Mapping Tool](#)
3. Schedule an appointment for FREE Application Assistance with CCLR [here](#) or reach out to CCLR at tag@cclr.org.

Spread the Word!

Grants ranging between \$40,000 - \$150,000 are available for vulnerable communities to hire Technical Advisors!

*Forward this email to colleagues or peers who would benefit from
TAG grant funding.*
